## CTEK shortlisted for three EV innovation awards

CTEK AB, the leading global brand in vehicle charging solutions, has been shortlisted for three Electrical Vehicle Innovation and Excellence Awards (EVIEs).

Launched in 2019, the EVIEs are designed to shine a light on innovation and excellence in the emerging EV sector, where innovation and collaboration will be essential to make our roads smarter and safer, and our air cleaner.

CTEK has been shortlisted in the **chargepoint manufacturer of the year** category, and two of CTEK's latest products – the **Chargestorm Connected 2** EV charger and the **Chargestorm Grid Central 500** dynamic load balancing system – have been shortlisted for the **best new product or service**.

Cecilia Routledge, Global Head of E-Mobility for CTEK said: "We are delighted to be shortlisted for these prestigious awards. The CTEK brand has been synonymous with top quality, highly trusted vehicle charging solutions for many years. Making the finals of these awards is true recognition of our deep commitment to supporting the transition to greener mobility through our innovations in the growing EV sector. It also reflects our unrivalled focus on product development, the quality, flexibility and reliability of our products, as well our strong customer-oriented approach."

Over the past 18 months, CTEK has expanded from its home market in Scandinavia and is now operational throughout Europe, with new bases and customers in the UK, France, the Netherlands and Germany. Sales have expanded rapidly, including partnering with EVC in the UK to install a substantial number of free EV chargers. CTEK has been successful in winning several competitive tenders across multiple countries, supported by a growing global presence, with regional logistics hubs offering efficient, responsive ordering and stock management, all backed by dedicated customer support and after sales teams.

CTEK's pedigree and passion for innovation has also paved the way for the formation of strategic partnerships with a number of key players in the global EV and automotive markets including vehicle manufacturers, utility and energy companies, local authorities and large corporate organisations.

CTEK's E-mobility solutions range from individual EV chargers to larger corporate and commercial installations with multiple charging stations, that require load balancing and integrate seamlessly with monitoring and payment equipment.

The EVIEs award winners will be announced in Bristol, UK on 19 October, on the first evening of the EV World Congress, hosted by Solar Media Limited. You can find more information at [evie.solarenergyevents.com/finalists](https://evie.solarenergyevents.com/finalists)

**ENDS**

## Notes to Editors

- Established in Dalarna Sweden, CTEK is the leading global brand in battery charging solutions, most specifically vehicle charging.
- CTEK offers products ranging from 12V & 24V battery chargers to charging solutions for electrical vehicles.
- Products are sold via a carefully selected network of global distributors and retailers, as original equipment, supplied to more than 50 of the world's leading vehicle manufacturers and through charge point operators, property owners as well as other organisations and individuals providing EV charging infrastructure.
- CTEK takes pride in its unique culture based on a passion for innovation and a deep commitment to supporting the transition to a greener mobility, by adhering to industry-leading ESG standards.
